Methodical recommendations

5.8. the movement in the ring

5.8.1. The dog is in the original position to the left of the party.

5.8.2. in all the exercises Hendlinga (shapes) should pay special attention to the fact that the party should not be between the judge and the dog. Handler should always address the position of judge, and decide on which side of your dog it must be.

5.8.3. When assessing movements in front of and behind their dog moves in a straight line from the strictly judges and back to it (so that the judge did not change its original position).

5.8.4. When you show a Dog Handler group must:

- Keep your dog away from others to avoid collisions;
- Do not disturb the judge in describing dog;
- Keep eksponiruemuû a dog on one line with rivals;
- In the conduct of dogs in a circle to keep distance and not let the dog catch dog running ahead.
- In cases of disturbances ahead of the ongoing party correctly around it.
- When all the shapes you need to pay special attention to the fact that the party should never be placed between a judge and a dog.

Explanation

There are several ways to make a detour, we recommend using one of the three most common in the world and suitable way. It is important that the dog could move forward quickly and without visible inhibition and its locomotion acted thus in the best way.

Rotate inside (fig. 1)

When turning inside dog is first on the left of the party, change of direction of the Handler and the dog are moving towards each other, and the leash, When this is passed with his left hand in his right hand. This twist is often used When you run and figure in time evaluation by the locomotive apparatus.

Рис. 1

Illustrative twist (fig. 2)

While often used for outdoor ring showcase turn the dog remains when changing directions on the left from the Handler that should quickly run around around the dogs, so she was not able to knock off the pace.

Рис. 2

Rotate outwards (fig. 3)

When rotating outward Hound, located to the left of the Handler and outlined by polukrugu. This dog looks especially good if the Handler must keep the following shape away from the judge. Sometimes this turn runs in to judge, especially when large demonstrations dog breeds, dog movement produces more smooth, effective. In this case, the Handler is still a short time between the judge and the dog. During this rotation you need to consider the size of the dog and its features propulsion system.

Рис. 3

Movement with a dog straight forward-backward (Figure 4.1 and Figure 4.2)

This exercise gives the judge the opportunity to evaluate the dvigatel'noû system exhibiting dogs and front and rear. In the performance should pay particular attention to the fact that the dog should be clearly in a straight line in the direction of from the judges, and then, without stopping, after turning left (rotate) or turn right (turning inward) on the same straight line back to the judge.

The judge does not change its original position. If the exercise make two dogs at the same time, it is recommended to handlers both watch that the dog ran right next to each other right in the sight of the judge and the dogs started simultaneously and in a direction from the judge and vice versa. It does not pay if the dog running faster than other dogs have to just slow down before going back to the judge, because in this case dogs are of course exempt them pace with most favorable

Рис. 4-1

Рис. 4-2

The movement for "Triangle" (fig. 5)

When driving on the triangle, the judge may consistently check the movement of the dog's rear, side and front. The participant must Choose a form of its triangle to the judge to evaluate the dog rear, side and front. This means that all three parties the triangle must have approximately odinakovoû long and that the opposite side of the triangle is the judge perpendicular to the direction of his gaze.

Рис. 5

Movement in the form of the letter "t" (fig. 6)

Movement in the form of the letter "t" provides all the conditions for a thorough assessment of the motor system of the dog back and the front and both sides. Whether you choose to complete the triangle, and when "t" Handler should remember that one of the lines is not must be too short and that the opposite judge line should be perpendicular to its look. Are encouraged to give special attention to the twists, so that party ever not blocking judge dog.

Рис. 6

Movement in the form of the letter "L":

Movement in the form of the letter "L" provides all the conditions for a thorough assessment of the motor system of the dog back and in front and on both sides, but this movement is preferable if the ring is very long and narrow.

Рис. 7

Circle (fig. 8.9)

As a rule, the judge stands in the middle of the circle and evaluates motion exhibited by dogs. When changing the position of the judge, goes out of range, and this at a time when dogs are inside it, the Handler must not reaching places worth a judge briefly to stand on the other side of the dog, and passing the judges back to its original place relative to the dog. He should not be between the judge and the dog.
